# BETTE

DESIGNED AND MANUFACTURED IN **GERMANY**

Bette shower trays are comfortable, beautifully shaped, and simply perfect in every detail. The tremendous variety of dimensions and the option of matt black, gloss black or gloss white open up freedom for any bathroom design. Bette shower trays are the perfectly hygienic solution.

**Glazed  
Titanium Steel**

**30**

**Years  
Warranty**

**Sustainable  
Quality**

Steel enamel at its best: Glazed Titanium Steel by Bette. The surface is harder than marble, plastic or steel alone. It is scratch-proof, non-porous and permanently UV-resistant. Bette's process permanently binds three ultra-thin layers of their special enameling formula to the titanium steel carcass in two firing steps at 850°Celsius. The resulting products unite the freedom of form of steel with the unique properties of glass.

## **Impact Resistant**

The secret behind Bette Glaze is the strength of its ultra-thin layer. Like glass fibre, it remains flexible and resilient to the usual forces that occur in the bathroom.

## **Surface**

Bette Glaze is harder than marble, plastic or steel alone, but nonporous and resistant to abrasion and UV rays. A premium quality guaranteed for 30 years.

## **Heat Conductive**

Titanium-steel alloy and enamel is a perfect heat conductor. It quickly absorbs the warmth of the bath water, to ensure a highly beneficial bath.

## **Scratch Resistant**

The surface of Bette Glaze is harder than marble, plastic or steel. When used as intended it is almost impossible that it will be damaged by any thing normally found in a bathroom.

## **Chemical Resistant**

Bette Glaze is Particularly robust. It is resistant to cosmetics and bath additives. Even nail polish will not mark it.

## **Hygienic**

Dirt and bacteria are unable to adhere to the glass-hard, non-porous surface of Bette Glaze. This makes it highly superior to softer materials or tiled areas.

## Bette Shower Trays - White

BETTE shower trays combine variety, comfort and elegant design. The flat shower tray is available in a variety of different sizes, and can be installed flush-to-floor, almost flush-to-floor, or slightly raised.

As a space, today's bathrooms have become a key feature room in modern contemporary homes. The Metro Glass / Franklin range offers you a design scope to suit most room designs. Whether you design an open shower, an alcove shower or a corner shower, we have the perfect glass to fit your space. Frameless glass showers help create a room that feels larger and more luxurious by maximising the amount of light through the room.

**Toughened  
Safety Glass**

**10**

**Years  
Warranty**

**Processed in  
New Zealand**

Metro Glass processes and toughens glass across its four locations in New Zealand. This toughening process heats the glass to a plastic state at around 650°C, it then moves through a quench area where it is rapidly cooled. This rapid cooling induces high-compression stress in the glass surface, while the centre remains in tension. What this does is to create an additional stress within the glass to increase its thermal and mechanical strength.

#### **Safety**

Toughened safety glass is much harder to break than standard (annealed glass). In the unlikely event of toughened glass breaking, it fractures into small particles, significantly reducing the risk of injury. The Metro Glass Franklin range is 10mm thick glass for extra safety and security.

#### **Strength**

Toughened safety glass has high strength and is 4 to 5 times stronger than standard glass of the same thickness due to the stresses induced during toughening. Toughened safety glass is also more thermally resistant than standard glass, to handle temperature changes like a hot to cold shower.

#### **Standards**

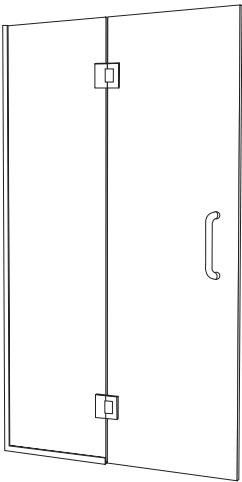

Metro Glass processes toughened glass in accordance with AS/NZS 2208: 1996 (Australia & New Zealand Standard). This Grade A toughened safety glass is also independently audited to ensure compliance. This see's samples broken on a regularly basis to ensure that if broken they will fragment into the agreed level of small fragments.

## Alcove Shower Doors

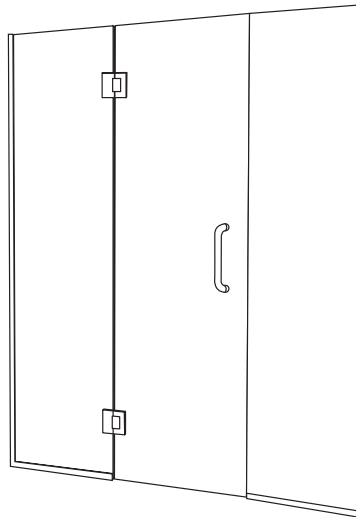

Alcove shower spaces let you take advantage of spaces that might otherwise be dead spaces in a bathroom. With a hinged door, it reduces the need for a wet area bathroom.
