

Profipress with SC-Contur

Piping technology
copper/gunmetal

Press connector system with press connectors made of copper and gunmetal tested in acc. with DVGW worksheet W 534 with DVGW test seal and pipes made of copper in acc. with EN 1057 in acc. with DVGW worksheet GW 392. Suitable for drinking water installations in acc. with DIN 1988.

For dimensionally stable concealed and pre-wall installations of manifold and riser pipes in Viega component assembly.

Press connectors

All sizes with SC-Contur – connections, which remain unpressed become visible when the system is filled. The SC-Contur is certified and fulfils the requirements of DVGW worksheet W 534, point 12.14, connectors with forced leakage. During leakage tests with water, Viega guarantees the identification of unpressed connections in the pressure range 0.1 MPa–0.65 MPa, in the case of a dry leakage test with compressed air or noble gases from 22 hPa–0.3 MPa.

Marking

Green dot on the press connection

Sealing elements

EPDM, black (ethylene-propylene-dien-monomer rubber); up to 110 °C; not resistant against hydrocarbon solvent, chlorinated hydrocarbon solvents, turpentine, petrol

Dimensions/Material

Standard sizes: d 12; 15; 18; 22; 28; 35; 42; 54 made of copper
 XL sizes: d 64.0; 66.7; 76.1; 88.9; 108.0 made of copper
 XL sizes: d 76.1; 88.9; 108.0 made of gunmetal
 Press connectors with threaded connection made of gunmetal:
 d 12–54; 76.1–108.0
 Press connectors with threaded connection made of copper:
 d 64.0

Areas of application

Drinking water
 Heating/Radiator connection
 Rainwater
 Compressed air, noble gases
 Cooling water pipelines
 Industry
 Plant engineering

Special applications

with EPDM sealing element, factory-fitted

- stationary sprinkler-extinguishing systems - with VdS certificate G 4980009 for the sizes DN20-DN50 in connection with copper pipes in acc. with EN 1057 R290 (hard)

- Solar systems with flat collectors

with FKM sealing element (accessories)

- Solar systems with flat/vacuum collectors

- District heat suppliers and low pressure steam systems

Use of the system for application areas and media other than those described here must be agreed with Viega Service Center.

Operating conditions

Drinking water installations

- Operating temperature max. 85 °C
- Operating pressure max. 1.6 MPa

Heating installations

- Operating temperature max. 110 °C
- Operating pressure max. 1.6 MPa

Note

Observe flow direction!

Components made of copper may not be installed upstream from galvanised ferrous materials!

Note – Limitations of use drinking water

(related to the material - except components as fittings, instruments etc.)

Pipes made of copper may only be used when the pH value of the drinking water is $\text{pH} \geq 7.4$ or the total volume of organic

carbon does not exceed $\text{TOC}_{\text{max}} = 1.5 \text{ mg/l}$ at values between $\text{pH} = 7.0\text{-}7.4!$

Note – Limitations of use heating systems

Observe VDI 2035 and EN 12828!

Certification

Profipress (d 12–54)

- DVGW-Reg.-No. DW-8511BQ0586

Profipress XL (d 64.0)

- DVGW-Reg.-No. DW-8511BQ0586

Use of press tools

The functional safety of the Viega press connector systems is primarily dependent on the perfect condition of the press tools and press machines used. For this reason, for the production of press connections, we recommend the use of Viega press tools and their regular inspection by authorised service points.

Technical data

Press connectors and components are constantly being optimised. If required, the current Z and installation dimensions can be obtained from the download area of the Viega homepage: viega.com

Accessories for use with Easytop fittings, see product area system fittings.

GTIN-Code (Global Trade Item Number, previously EAN-Code)

The GTIN-Code composed out of the constant manufacturer number 4015211 and a six-digit article code - in this example 305 611. The exchange of the last six digits against the article code shows the GTIN-Code.
